

Letter of Recommendation

I am pleased to recommend Sem Sethy, who has worked in our team as an iOS Engineer for over a year. As the department head, I have had the opportunity to observe his performance and professional development during this time.

Although Sem Sethy is still relatively early in his career, he has demonstrated a responsible attitude, a strong willingness to learn, and an open mindset toward new challenges. When facing unfamiliar technical issues or tasks, he takes the initiative to understand the problem, explore possible solutions, and learn from feedback.

In his role, Sem Sethy has contributed to our iOS development work and successfully supported the delivery of company projects. He works well with colleagues across different functions and can be relied upon to complete his responsibilities with care and professionalism.

Overall, I consider Sem Sethy a reliable and motivated engineer with good potential for continued growth. I believe his positive attitude, willingness to learn, and sense of responsibility will allow him to contribute effectively in his future role.

I am pleased to recommend him for opportunities that match his experience and professional background. Please feel free to contact me should you require any further information.

Sincerely,

Frank C.-W Hung
Head of Digital Development Section
Cathay United Bank (Cambodia) Plc.
